

From Idea to Integration

At LumenRadio, we've helped world-leading manufacturers integrate wireless successfully into their products.

From the first conversation to product launch, your journey with us will be straightforward, fully supported and designed to get you to market at speed.

SPEED AND SIMPLICITY

- **Low investment, high return**
Easy integration with minimal internal resources or engineering effort.
- **Launch in months, not years**
Faster time-to-market thanks to globally pre-certified modules.
- **Integration without the headache**
Clear, predictable implementation steps.

SCALABILITY AND INTEROPERABILITY

- **Connected by trust**
Join a growing ecosystem of interoperable solutions backed by trusted global brands in demanding industries.
- **Future-proof design**
Go wireless with Modbus, BACnet and DALI with readiness for evolving standards. Full interoperability across wired and wireless systems for each of these protocols.

PROVEN RELIABILITY

- **Wireless that just works**
Integrate a patented wireless technology built on years of expertise from delivering wireless which works in the toughest environments.
- **Your partner at every phase**
Hands-on support from the first meeting to product launch.
- **Expertise when you need it**
Direct access to our wireless specialists in Sweden, Germany, USA and China.

BACKED BY TRUSTED GLOBAL BRANDS

INTEGRATE WIRELESS IN 4 SIMPLE STEPS

1 INTRODUCTION

Exploring the Opportunity

Goal: The first meeting clarifies your products and identifies the best wireless solution, showing how connectivity can add value to your offering.

2 EVALUATION

Proof of Concept, Testing and Validation

Goal: You verify LumenRadio's technology through a hands-on Proof of Concept using our evaluation kit.

3 PREPARATION FOR PRODUCTION

Finalizing the Product Design

Goal: After approving the PoC, you move into preparing a production-ready product design, with LumenRadio supporting as needed.

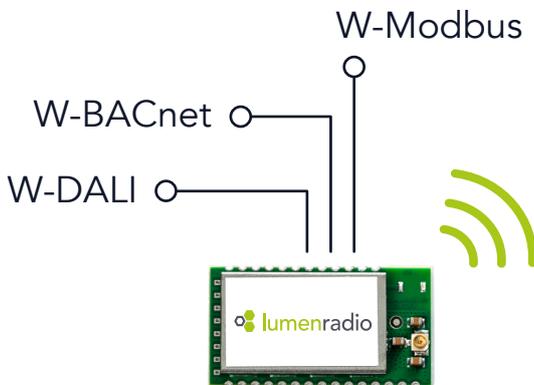

4 LAUNCH

Going to Market

Goal: LumenRadio supports you through certification, production start, and a smooth commercial launch.

AVERAGE PROJECT DURATION: 13 months

WIRELESS MODULES FROM LUMENRADIO

Our range of OEM RF modules can be directly integrated into your device to make it wireless.

We have wireless alternatives for the BACnet, DALI and Modbus cable protocols.
