

Stardust

Eight Universe DMX/RDM transmitter with Ethernet and WiFi

Stardust is the problem solver for the most demanding users and situations. Featuring eight universes of CRMX² and multiple connectivity options, it is the most sophisticated Wireless DMX system on the market. With the introduction of an integrated web portal for full control and configuration it has the reliability you've come to trust, with the universes you need.

Tailor your equipment to meet your specific needs with accessories such as V-Lock battery mount, rack mount, and wall mount.

Web portal provides a dashboard accessible from anywhere on the network, giving a status overview and ability to configure the device regardless of location.

Linking Key encrypts the CRMX transmission with user specified keys, making it possible to add redundancy and move between CRMX networks in a completely new, smooth, way.

- Eight universe CRMX² transmitter
- DMX/RDM, sACN and Art-Net 4
- Ethernet through 5 GHz WiFi
- Configuration via web portal or front panel
- Transmits CRMX², CRMX Classic, W-DMX G3 / G4S

EIGHT UNIVERSE TRANSMITTER

Stardust Specifications

Supported Protocols
 DMX / RDM
 sACN / Art-Net 4
 CRMX² / CRMX Classic
 W-DMX G3 / G4s
 Ethernet
 WiFi 802.11b/g/n/ac
 Bluetooth 5.0

RF Characteristics
 Frequency: 2402-2480 MHz
 Built on TimoTwo
 Fixed 5ms latency
 128-bit encryption
 Forward Error Correction

Connectors
 Ethernet: RJ45
 Antennas: 2dBi RP-TNC
 DC: 2.5mm/5.5mm Barrel
 AC: powerCON TRUE1

Power
 PoE IEEE 802.3at
 DC 10-20 V
 Backup battery (15 minutes)
 AC 100-240 VAC

Physical
 IP20 Aluminium enclosure
 Color screen and rotary knob
 M10 and 3/8" Threads
 Accessories for V-lock battery-,
 rack- and wall mount.

Aurora

Single universe DMX/RDM transceiver with WiFi and Bluetooth

Aurora is the flexible unit able to transmit or receive one universe of DMX/RDM with several connectivity options. Using the intuitive color screen to change settings on the fly and move between universes, it is powerful enough for single universe transmissions as well as being a receiver packing the most advanced features.

FEATURES

- Single universe CRMX Flex unit
- DMX/RDM, sACN and Art-Net 3
- 5 GHz WiFi and Bluetooth
- Configuration via app or front panel
- Compatible with CRMX and W-DMX

Luna

Single universe DMX transceiver with Bluetooth

Luna is the essential flex unit that gets the job done, being able to transmit DMX or receive DMX/RDM for one universe. Featuring the same reliable CRMX as all other devices from LumenRadio it also features Bluetooth connectivity in a compact and rugged format.

FEATURES

- Single universe CRMX Flex unit
- DMX/RDM
- Bluetooth
- Configuration via app
- Compatible with CRMX and W-DMX

MoonLite

Rechargeable DMX/RDM transceiver with Bluetooth

MoonLite has the same reliable functionalities as all CRMX products in a much smaller size and with the built-in battery it can quickly add Wireless DMX and RDM to any system. MoonLite enables tablet based lighting control softwares to connect directly without the need for extra hardware. The ideal tool for all users of Wireless DMX at clubs, small stage events, in theaters and temporary events where Wireless DMX connectivity is needed.

FEATURES

- Single universe CRMX Flex unit
- DMX/RDM
- Rechargeable battery and DC power
- Bluetooth
- Configuration via app
- Compatible with CRMX and W-DMX
